

Muzaffer Nizam

Sr. Hardware Design Engineer

Location : Antalya, TURKEY
Age : 35
Phone : +90 536 222 90 10
Mail : muzaffernizam@gmail.com

TOTAL EXPERIENCE (7 Years 2 Months)

Education

Bachelor's of Science, Electrical & Electronics Engineering
Akdeniz University

Oct. 2016

Hardware Experiences;

- I am using Kicad, Altium and Eagle EDA programs in Hardware Design,
- Pin assignment according to role such as communication, input, output, PWM, Analog etc.
- Design Compliant with IPC2221 Electrical Conductor Spacing Standards and EMC Standards,
- Design Compliant with different density Via dimensions of IPC-2221,
- Design Compliant with different Environmental Temperatures and Pressures
- Multilayer PCB Design 2,4 and more Layers by following Layer Stack Management,
- Various FR4 Types and Flex PCB Design,
- Design compliant with BGA components
- Choosing different temperatures density PCB Materials such as FR-4 TG 130-140, TG 170 etc,
- Various Design using with STM32xx, CC13xx Ti, TM4Cxx Tiva Series MCU,
- Various Communication Board Design with Quectel MC60xx GSM module, Quectel EC200xx LTE module, Quectel EG915xx LTE module
- Power Circuit Designs Such as Switching Regulators, Switching Controllers, PMIC,
- Motor Control Drivers Designs such as Brushed DC, BLDC, PMSM etc
- Digital Designs SPI, I2C, DAC, RS485, UART, Ethernet, CAN Bus,
- Wireless Communication Designs GSM, GNSS, Bluetooth, RF Sub 1 GHz, Wifi 2.4 GHz,
- System Modelling, simulation and analysis with Matlab Simulink,
- Analog Design ADC, DAC, FSK Communication on Power Line, various OP-AMPS Gain Calculating, Analog Filters Designs,
- Using LTspice, Measurements with Oscilloscopes and Reports
- Environmental Test such as Temperature test, Pressure Test, ESD Gun Test,
- Creating PBA and PCB Production Files, Gerber Files, Pick and Places Files, DXF and Step files for Mechanical Designs,
- Controlling with GERBV (free Gerber viewer)
- Prepare Bill of Materials List.
- Version Control with github.
- Short Circuit Testing,
- Voltage Level Testing,

Firmware Experiences;

- Code Generations with STM32CubeIDE,
- Low level driver preparing,
- UART/USART Communication Firmware Testing,
- Can Bus Communication Firmware Testing,
- SPI, I2C and RS485 Communication Firmware Testing,
- ADC Input Firmware Testing,
- DAC Output Firmware Testing,
- PWM Generation Firmware Testing,
- General Input detect and Output Control Check Firmware Test even include Interrupts,
- Hardware Verification with Firmware.

JOB EXPERIENCES

1- Electrical & Electronics Engineer Intern (3 Months)

June 2013- September 2013

Company: Turkcell Communication A.Ş.

Website: <https://www.turkcell.com.tr/>

Job Type: Intern / Full Time

Reason for Leaving: Intern Finished

Job Deification:

- GSM Base Station Location Planning,
- Various Technical Calculating,
- Field operations.

2- Electronics R&D Engineer (2 Years 4 Months)

August 2015- October 2017

Company: Desird Tasarım Arge Uygulama Elekt. Des. İth. İhr. San LTD ŞTİ

Website: <https://desird.com/>

Job Type: Permanent/Full Time

Reason for Leaving: Military Status

Job Deification:

Hardware Designed below projects;

- Biomedical Electronic Card Designs
- Elevator DC Door Control Driver Board Designs
- IOT Card Designs
- Telemetry Card Designs with FSK communication on DC Power Line
- Main Board Designed which is communicating with Telemetry Cards,
- Test Machine Design contains with Pogo Test Probe Tips
- In addition in relevant projects doing Hardware Designs(Schematic and PCB), Measuring, Reports and Tests,
- Designed with STM32xx, CC13xx Ti MCU's, PIC18xx MCU's

3- Electronics R&D Engineer (2 Years 8 Months 15 Days)

May 2018- February 2021

Company: Desird Tasarım Arge A.Ş. (Same Company previous one, but Commercial Title of Company changed)

Website: <https://desird.com/>

Job Type: Permanent/Full Time

Reason for Leaving: Resignation

Job Definition:

Hardware Designed below projects;

- Elevator BLDC Door Control Driver Board Designs
- IOT Card Designs
- Test Equipment Design contains with Pogo Test Probe Tips
- Railway BLDC Door Control and Safety Boards which has Safety Relay and compatible relevant SIL Certificate,
- In addition in relevant projects doing Hardware Designs(Schematic and PCB), Measuring, Reports and Tests,
- Designed with STM32xx, STM8xx, NXP MCU's, PIC16xx MCU's

4- Electronics R&D Engineer (1 Years 1 Months 19 Days)

February 2021- April 2022

Company: Ake Elevator and Escalator LTD

Website: <https://ake.com.tr/>

Job Type: Permanent/Full Time

Reason for Leaving: Company created another Company as for Electronics R&D called Acir Industrial LTD ŞTİ

Job Definition:

Hardware Designed below projects;

- Elevator DC Door Control Driver Board Designs
- Remote control with GSM Communication Card Designs
- Various Elevator Control Boards Designs,
- Water Vending Control Boards Designs,
- Elevator Main Control, Cabin Buttons Boards, Top and Bottom of Cabinet Boards, Floor Calling Boards which is communicating with CAN Bus and DC and AC signal Lines,
- In addition in relevant projects doing Hardware Designs(Schematic and PCB), Measuring, Reports and Tests,
- Designed with TM4Cxx Ti, MSP432xx ARM Core, MSP430xx Ti, Quectel MC60xx GSM module

5- Electronics R&D Engineer (1 Years)

April 2022 - Still Working

Company: Acri Industrial LTD ŞTi

Website: <https://www.acritechnology.com/>

Job Type: Permanent/Full Time

Reason for Leaving: ***

Job Definition:

Hardware Designed below projects;

- Elevator DC Door Control Driver Board Designs
- Remote control with GSM Communication Card Designs
- Various Elevator Control Boards Designs,
- Elevator Main Control, Cabin Buttons Boards, Top and Bottom of Cabinet Boards, Floor Calling Boards which is communicating with CAN Bus and DC and AC signal Lines,
- Test Machine Design contains with Pogo Test Probe Tips
- Hand terminal Board design. To perform OTA update using GSM and LTE Moduls,
- In addition in relevant projects doing Hardware Designs(Schematic and PCB), Measuring, Reports and Tests,
- Designed with TM4Cxx Ti, STM32xx, Quectel MC60xx GSM module, Quectel EC200xx LTE module, Quectel EG915xx LTE module

One of my Personal Design Project;

- It is called STM32 Mega Development Board
- Contains Technologies as a below;
 - ✓ 24V AC or DC Power Input,
 - ✓ 2 different Switching Regulator GSM and General System Power as 4.3V and 5V,
 - ✓ Controlling GSM Power with XOR Gate and Transistor,
 - ✓ Analog Bus Voltage Read with Buffer op amp,
 - ✓ DAC Output,
 - ✓ Voltage levels are 24V, 15V, 5V, 4.3V, 3.3V,
 - ✓ USART communication with USB Mini also contains Programming,
 - ✓ CAN Bus Communication,
 - ✓ RS485 Communication,
 - ✓ SPI and I2 Communication connected to Connectors,
 - ✓ SD Memory Card communicated with SPI Interface,
 - ✓ 16x2 Character LCD Display communicated with I2C Interface,
 - ✓ FLASH Memory communicated with I2C Interface
 - ✓ Non-Isolated Signal Input,
 - ✓ Darlington Output with ULN2004 IC,
 - ✓ Linear Potentiometer Analog Read,
 - ✓ Between Range of 0V to 600V DC Voltage Read with op amp,
 - ✓ Between Range of 0-10A Current Read with op amp,
 - ✓ Short Circuit Detection,
 - ✓ DC and BLDC Motor Control Driver Circuit with Back EMF Current Reading,
 - ✓ Encoder Input (Absolute and Incremental)
 - ✓ 16 Channel Isolated Input detected with Shift Register Input,
 - ✓ Accelerometer (ADXL345 IC) communicated with SPI,
 - ✓ 4 Buttons for LCD Controlling,
 - ✓ 24V Relay Output (SPDT 1 FORM C),
 - ✓ SIM800C GSM Modul communicated with SPI Interface

Figure 1 : STM32 MEGA Development Board

Figure 2 : STM32 MEGA Development Board (another version)

Foreign Language

✓ English Level : B2-Upper Intermediate (English Culture Course in Antalya)

Certificate Code: 8882201740

<https://verifiedportfolios.com/>

Certificates

✓ Safety Integrity Level for RAILWAY SYSTEM ELECTRONICS - **TUV NORD**

April 2019

✓ Humanoid Robots Industrial Automation - **ENTEK EDUCATION TECH.**

December 2012

Hobbies

- Latin Dances Salsa & Bachata
- Theatre
- Cats and Dogs
